

ABSTRACT

The invention concerns pharmaceutical compositions with wound healing or anti-complementary activity, and their uses, said compositions comprising. (1) at least a dextran derivative of general formula $DMC_aB_bSu_c$, a, b, and c respectively representing the degrees of substitution in the groups MC, B and Su, wherein $a \geq 0.6$, $b = 0$ or ≥ 0.1 , and $c = 0$ or ranges widely between 0.1 and 0.5 for a wound healing composition, and $a \geq 0.3$, $b \geq 0.1$ and $c = 0$ or ranges widely between 0.1 and 0.4 for a composition with anti-complementary activity; (2) and at least a pharmaceutically acceptable carrier, said dextran derivative being present in a single unit dose or at a concentration adapted to the desired wound healing or anti-complementary activity.
